PART IV: READING COMPREHENSION

The cabin can be equipped in different configurations. The three cabin configurations are mixed class, all economy and high density. The mixed class cabin configuration accommodates a business class with four seats abreast and a tourist class with six seats abreast. The all economy cabin configuration accommodates only a tourist class with six seats abreast. The high density cabin configuration accommodates only a tourist class with six seats abreast and a decreased seat pitch. The cabin attendant seats are attached to partitions or lavatory walls. Depending on the cabin configuration, the number and the location of cabin attendant seats can vary. The number and the location of the galleys and lavatories change with the cabin configuration. The classes and zones are divided by floor-mounted partitions and ceiling-mounted curtains. The cabin arrangements are defined by the customer and have an impact on the seat count.

1. **According to the passage,**
 - A) the cabin configurations can only be done in two ways.
 - B) only the economy cabin configuration provides four seats abreast.
 - C) all the economy cabin configuration provides a tourist class with six seats abreast.**
 - D) the high density cabin configuration provides a business class with six seats abreast.

2. **Cabin attendant seats.....**
 - A) are between partitions and tourist class seats.
 - B) can be located on different numbers and places.**
 - C) are next to the galleys and lavatories.
 - D) do not change according to the cabin configuration.

3. **Only high density cabin configuration accommodates.....**
 - A) a tourist class with six seats abreast and a decreased seat pitch**
 - B) a business class with four seats abreast
 - C) a tourist class with six seats abreast and a seat pitch
 - D) an economy class with four seats abreast

PART V: CLOZE TEST
